Volume XIII, No. 2

## Our Most Valuable Asset

If you ever wondered how to pray, pray that God will help us to be wise with our time. We know we'll never finish everything there is to do, it's just a matter of making good choices of what to spend our time on. Pray that we would use our time to reap eternal benefits for the Kingdom!

## Build a House & Change a Life!

CLTC is far removed from any real town. That means there is no off-campus housing and all full-time students must live on campus. Therefore, how many students we can have is directly related to how many we can put into a house. This year we only had room for 30 new students, which means we turned away 130 applicants! Next year it will be worse. We are expecting 200 applications for a similar number of openings! Also, we hope to begin a full-time masters degree course. Many of these students are married and they will come with their families, so we need housing!

Next June, Mobile Mission Maintenance (MMM) Australia is sending a team to build four new married student houses. However, we need the building materials first. That is going to run \$24,500 per house. If you would like to help, either make a check out to "Pioneers" and enclose a note with our name and say it's for "Student Housing." Or, go online for more options.

These houses will last... this one is 10 years old and still looks almost new!

## A Late-Night Phone Call

It's 5:00 on a Sunday morning and my phone is ringing... probably a wrong number or someone didn't figure the time change correctly. Now it's 5:30 and I see it's my mom calling, and by the time I wipe the sleep from my eyes, my brother is calling. Uh oh.

They were calling to

tell me that Dad had had a massive stroke. Within hours he passed away. Thus began a whirlwind two-week trip home. That was 3 months ago. I've caught back up but I still miss him... and his prayers. My mom is finding life without him hard. Pray that she will find the stability my dad provided in her Lord.

## Prayer Briefs:

### Kick the Boot

While we were in the US Michelle went to a foot doctor. X-rays showed either an extra bone or hard fibrous tissue in her ankle. The short term solution is cortisone injections. Praise God she no longer needs the "ski boot"!

### Printer/Copier/Scanner

Michelle not only orders books, she also looks after our multi-purpose machine. No one has had time to get the scanner working but it would be a great asset! Pray she can get it figured out.

### Third Term...

I'm still under a full teaching load. I was just keeping my head above water until assignments started rolling in!

### Field Address:

Kent & Michelle Mundhenk
